

Navdeep Singh Dhunna

Full-Stack Software Engineer

navdeep.s.dhunna@gmail.com · +91 78019 83501 · Surat, Gujarat · [linkedin.com/in/navdeepsingh-dhunna](#) · [github.com/NavdeepSingh0](#)

3rd-year CS undergraduate with 4 production-deployed full-stack systems across FinTech, AI SaaS, and civic tech. Proficient in Next.js/React Native frontends, FastAPI/Node.js backends, and PostgreSQL/Supabase databases. National Top 10 Finisher at Zomato's Zomathon Hackathon (out of 500+ teams) and co-author of an IEEE-format research paper on deep learning XAI.

PROJECTS

Meridian — AI Resume Builder & Performance Engine <https://meridian-cv.vercel.app/>

Next.js 19 · TypeScript · Django · Gemini API · Zustand · html2pdf.js

- Production-deployed a decoupled full-stack resume builder using Next.js 19 and Django, serving optimized client data layouts under 100ms.
- Engineered an AI critique layer via Gemini API that outputs structural JSON patches with a 94% validation rate.
- Implemented a state-mutation feature using Zustand, allowing users to instantly update React form states with AI suggestions in one click.

Carto — Cart Recommendation Engine carto-demo.netlify.app

Python · FastAPI · React.js · LightGBM · Item2Vec · Vite · Kaggle

- Built a two-stage recommendation engine using a LightGBM ranker and Item2Vec embeddings, achieving sub-100ms P90 latency and a 30% lift over baseline.
- Synthesized and published a 14,000-interaction dataset on Kaggle, securing over 500 downloads.

Credwork — Gig Worker Income Verification App credwork.vercel.app

React Native · FastAPI · PostgreSQL · Supabase · scikit-learn · ReportLab

- Shipped a fintech mobile app targeting income verification for India's 400M+ informal workers, alongside a live Next.js marketing site.
- Built 4-layer fraud detection pipeline: PDF metadata analysis, font consistency checks, Benford's Law, and Isolation Forest anomaly detection on UPI transaction data, with a 99% accuracy rate in fraud detection
- Developed GigScore algorithm (0–1000) evaluating income consistency over 6-month rolling window; auto-generates QR verified PDF certificates via ReportLab, with a 25% increase in loan approvals

EDUCATION

B.E. Computer Science and Engineering — Chandigarh University, Mohali · 7.79 / 10

2024 – Expected(2028)

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C/C++, SQL **Frontend:** React.js, React Native, Next.js, Vite, Tailwind CSS, shadcn/ui **Backend:** FastAPI, Node.js, Express.js, Django, Flask, REST APIs **Databases:** PostgreSQL, MongoDB, Supabase, Firebase, MySQL, Redis **ML & AI:** LightGBM, scikit-learn, Isolation Forest, Item2Vec, Gemini API, Ollama **DevOps & Tools:** Docker, Git, GitHub, Vercel, Netlify, Postman, CI/CD

AWARDS & RECOGNITION

Top 10 / 500+ teams, Zomathon Hackathon (Zomato) — published 14,000-row Carto dataset on Kaggle.

Finalist, Hackshastra 2.0 (Chandigarh University) — Top teams out of 500+ participants with Credwork.

Co-authored IEEE-format paper on explainable deep learning for PCOS detection using CNNs with Grad-CAM and EigenCAM XAI evaluation.
